Summary

Enthusiastic and dedicated B.Tech graduate in CSE with a passion for web development. Skilled in HTML, CSS, JavaScript, jQuery, PHP, and MySQL. Strong understanding of C++ and OOPs. Eager to contribute to real-world software solutions.

Education

S.R.M. Institute of Science and Technology — **May 2024**
B.Tech in Computer Science, CGPA: 8.4 — *Ghaziabad, UP*

Minerva Public School — **2020**
12th Grade, CGPA: 87.2% — *Bilaspur, Himachal Pradesh*

Experience

Avaptech Solutions — **May 2025 – Present**
Industrial Training as a Web Developer — *Chandigarh, India*

- Automated keyword position tracking in Google Sheets using Google Apps Script and DataForSEO API with features like row filtering, scheduling, and result formatting.
- Worked on a custom-built WordPress platform for job hiring (ProjectCasting) with advanced messaging features and SendGrid email integration including inbound parsing and real-time notifications.
- Converted Figma UI designs into responsive and visually appealing pages using WPBakery page builder.
- Added dynamic functionality using JavaScript, PHP, and jQuery for interactive WordPress sections.
- Gained hands-on experience in implementing core Object-Oriented Programming concepts in C++ such as encapsulation, inheritance, polymorphism, and abstraction.
- Understood database connectivity and how SQL queries work for storing, retrieving, and manipulating data effectively.

Projects

QuickHire - Job Portal Web App — **2024**

- Developed a responsive dark-themed job portal with secure job posting and role-based logins.
- Integrated Google Places API for location autocomplete. Built using HTML, CSS, JS, PHP, and MySQL.

Google Sheet Keyword Automation — **2025**

- Automated keyword position tracking using Google Apps Script and DataForSEO API in Google Sheets.
- Implemented scheduling, row filtering, and result formatting for streamlined reporting.
